IT Equipment Loan Procedure

IT-LOAN-204 | Version 1.0 | Owner: IT Coordinator | Reviewed: 18 October 2026

FICTIONAL COMPANY DATA - FOR DOCUMENT UPLOAD TESTING

Control temporary loans of shared laptops, monitors, and presentation equipment in the fictional Sentral Ops office. Equipment availability must be checked with the IT Coordinator.

Request lead time	At least two working days before collection
Standard loan	Up to seven calendar days
Extension	One extension of up to seven additional calendar days
Return deadline	16:00 on the agreed return date

Request and collection

- Submit your name, department, business purpose, equipment type, collection date, and return date to the IT Coordinator. Your manager endorses the business need; IT confirms availability and authorises the loan.
- At collection, record the asset tag, charger and accessory list, condition, and agreed return date. The borrower and IT Coordinator both acknowledge the handover record.
- Do not lend the equipment to another colleague or install unapproved software. Report a missing or lost device to the IT Coordinator within 30 minutes of discovering the issue.

Extension and return

- Only the IT Coordinator can approve an extension. Request it before 16:00 on the working day before the current return deadline. A manager endorsement alone does not extend the loan.
- Only one extension is allowed, for no more than seven additional calendar days. IT must record the new due date in writing.
- Return the equipment and all listed accessories by 16:00 on the due date. If that date is a non-working day, return it by 16:00 on the preceding working day.

Overdue equipment

- When a loan is overdue by one calendar day, IT notifies the borrower and their direct manager. IT records the return condition before closing the loan.
- The assistant can explain the procedure but cannot reserve an asset, confirm live availability, extend a loan, or mark equipment as returned.
